ROYAL COLLEGE OF SURGEONS, LONDON.—The original Hygienic Vegetable Medicine, prepared by W. Miskin, Esq., member of the Royal College of Surgeons, Licentiate of Apothecary's Company, Fellow of Bolt Court Society, Surgeon to the Royal Union Pension Association, Lancaster Place, Waterloo Bridge, and perpetual pupil of Guy's and St. Thomas's Hospital, London.

This valuable medicine, the result of twenty years' experience and unparalleled success in the extensive and highly respectable practice of the proprietor, patronised by the faculty and nobility, is now introduced to the notice of the American public, at the earnest solicitation of a number of gentlemen of long and high standing in the profession. It is hoped, as a preliminary step, to check the evils and fatal consequences arising from the use of the numerous deleterious nostrums foisted upon the public by the aid of fabricated proofs of miraculous cures, and other frauds, by a set of mercenary, unprincipled pretenders, so totally ignorant of medical science that it is impossible the monstrous delusion can any longer go down with the intelligent people of this country. These pills, mild and agreeable in their nature, should be kept in every family in cases of sudden illness, for by their prompt administration, cholera, cramps, spasms, fevers, and other alarming complaints, which too often prove fatal, may be speedily cured or prevented. In fact, all those who value good health should never be without them. They are sold in packets, at 50 cents, \$1, and \$2 each, by every respectable druggist, bookseller, and vendor of medicine in the United States and the Canadas, with copious directions, together with testimonials of professional ability from the following eminent gentlemen: Sir Astley Cooper, J. Abernethy, Jas. Blundell, M. D., W. Baek, M. D., J. Aston Key, A. Frampton, M. D. and numerous others. The originals may be seen in possession of the general agent, by whom the medicine is imported into this country, and to whom all applications for agents must be made.

Camden Commercial Courier.
THE Establishment of the COMMERCIAL COURIER was rendered necessary by the inconvenience to which our citizens have been subjected for the want of a public channel of communication which in a commercial community like Camden, is essentially necessary, and consequently the COURIER'S claim on the public is such as should ensure a liberal patronage.

The undersigned have spared no trouble or expense in obtaining the best workmen in order to render the Paper all the advantages that it will admit of, and affording satisfaction to its patrons.

In political matters the Courier will take no part; the design being to publish a Paper adapted to the interest of the community, which could not be effected by its entering into the arena of Politics—it will be confined principally to such matters as appertain to Commerce, Agriculture and Amusement.

The COURIER is published every Saturday morning at Three Dollars in advance, or Four Dollars if not paid until the expiration of the year.

TO PRINTERS.
E. White & Wm. Hager,
RESPECTFULLY inform the Printers of the United States, to whom they have been individually known as established letter founders, that they have now formed a co-partnership in said business, and an extensive experience, they hope to be able to give satisfaction to all who may favor them with their orders.

The introduction of machinery in place of the tedious and unhealthy process of casting type by hand, by American ingenuity, a heavy expenditure of time and money on the part of our senior partner, first successfully accomplished. Extensive use of the machine-cast letter has fully tested and established its superiority in every particular, over those cast by the old process.

The letter foundry business will hereafter be carried on by the parties before named, under the firm of White, Hager & Co. Their Specimen exhibits a complete series, from Diamond to Sixty-four Lines type. The Book and News type being in the most modern style.

WHITE HAGER & Co. are agents for the sale of the Smith and Rust Printing Presses, with which they can furnish their customers at manufacturers' prices; chases, cases, composing sticks, ink, and every article used in the printing business, kept for sale and furnished on short notice. In type taken in exchange for new at nine cents per lb.

N. B.—Newspaper proprietors who will give the above three insertions, they will be entitled to five dollars in such articles as they may select from our Specimens. at 23t E. WHITE & HAGER.

Removal.
THE Subscriber has removed his Drug Establishment to the building opposite the store of Murray & Bryant, and two doors south of the Masonic Lodge—where he is now receiving and opening his Spring supply of Medicines, Paints, Oils, Window-glass, &c. His stock will be found as complete as any in the up country, and his prices as low. Physicians, planters and others interested, are invited to call—as no exertion will be wanting to ensure satisfaction as to quality and prices.

JONES' PATENT COTTON GIN.
THIS Gin can be made double, or single. It made double, they reduce labor, and gin just double, the quantity of cotton over the single cylinder Gin, no other kind having been in use previous to this patent; and whether single or double, they are found to improve the quality of the cotton, by more perfectly cleaning it. They can be made to contain from 20 to 160 saws in a stand, and whether small or large, one hand will be sufficient to attend them. The Gins have mechanical feeders and hoppers attached to them, which free the cotton from leaves, trash, dirt, &c. before it can reach the saws, and by the thorough hawking operation it receives from the feeders, which make two revolutions to one of the saws, it is almost in a half gined state, before it descends to the saw. By a very simple arrangement of a screw to each set of gates, on which the hoppers rest, and through which the teeth of the feeders pass, they can be made to feed slow or fast to suit the condition of the cotton at the time. When made double, the saws are placed on two sets of cylinders and turn upon each other in opposite directions, and are cleaned by two sets of brushes that have four revolutions to one of two saw. The two cylinders can be detached so as to enable the planter to run one or both at pleasure, although embraced with feeders, &c. in one stand. The whole is put in operation with a drum and band, as in the ordinary Gin, and may be propelled by horse, steam, or water power. It may also be propelled by iron running gear. The force required to work it, is about the same as that necessary to move an equal number of saws in the common Gin. This Gin has been put in operation in New Orleans for two or three weeks, and its success tested in the presence of a large number of planters, merchants and others, and received their general approbation.

Several gentlemen have been so kind as to give the Patentee their written opinion respecting the merits of the Gin. A number of others could be added, but the following are deemed sufficient:
From his Excellency Gov. White of Louisiana,
New Orleans, Feb. 27, 1837.
Dr. A. Jones—Sir, In reply to your enquiry, what I think of your improved Cotton Gin, I have to say, that I saw it work on Saturday the 25th inst. and was very much pleased with its performance. The mere fact of its self-feeding, seems to me to be a very valuable improvement; and besides, the quality of the cotton, as it comes out of the process, appeared to me to be better and cleaner than from the common Gins in use, and that it saves considerably in labor. Respectfully, &c.
E. D. WHITE.
From Mr. J. Compton, a wealthy planter, resident in the Parish of Rapide, Louisiana.
Dr. Jones—Dear Sir, I have examined your Patent Cotton Gin, with feeders, &c. And have seen it in operation, and approve of it so highly, that I have taken the liberty of ordering one for my plantation in time for the next crop.
Yours respectfully,
J. COMPTON.

JONES' PATENT COTTON GIN.
THIS Gin can be made double, or single. It made double, they reduce labor, and gin just double, the quantity of cotton over the single cylinder Gin, no other kind having been in use previous to this patent; and whether single or double, they are found to improve the quality of the cotton, by more perfectly cleaning it. They can be made to contain from 20 to 160 saws in a stand, and whether small or large, one hand will be sufficient to attend them. The Gins have mechanical feeders and hoppers attached to them, which free the cotton from leaves, trash, dirt, &c. before it can reach the saws, and by the thorough hawking operation it receives from the feeders, which make two revolutions to one of the saws, it is almost in a half gined state, before it descends to the saw. By a very simple arrangement of a screw to each set of gates, on which the hoppers rest, and through which the teeth of the feeders pass, they can be made to feed slow or fast to suit the condition of the cotton at the time. When made double, the saws are placed on two sets of cylinders and turn upon each other in opposite directions, and are cleaned by two sets of brushes that have four revolutions to one of two saw. The two cylinders can be detached so as to enable the planter to run one or both at pleasure, although embraced with feeders, &c. in one stand. The whole is put in operation with a drum and band, as in the ordinary Gin, and may be propelled by horse, steam, or water power. It may also be propelled by iron running gear. The force required to work it, is about the same as that necessary to move an equal number of saws in the common Gin. This Gin has been put in operation in New Orleans for two or three weeks, and its success tested in the presence of a large number of planters, merchants and others, and received their general approbation.

Several gentlemen have been so kind as to give the Patentee their written opinion respecting the merits of the Gin. A number of others could be added, but the following are deemed sufficient:
From his Excellency Gov. White of Louisiana,
New Orleans, Feb. 27, 1837.
Dr. A. Jones—Sir, In reply to your enquiry, what I think of your improved Cotton Gin, I have to say, that I saw it work on Saturday the 25th inst. and was very much pleased with its performance. The mere fact of its self-feeding, seems to me to be a very valuable improvement; and besides, the quality of the cotton, as it comes out of the process, appeared to me to be better and cleaner than from the common Gins in use, and that it saves considerably in labor. Respectfully, &c.
E. D. WHITE.
From Mr. J. Compton, a wealthy planter, resident in the Parish of Rapide, Louisiana.
Dr. Jones—Dear Sir, I have examined your Patent Cotton Gin, with feeders, &c. And have seen it in operation, and approve of it so highly, that I have taken the liberty of ordering one for my plantation in time for the next crop.
Yours respectfully,
J. COMPTON.
New Orleans, Feb. 28, 1837.
From Mr. A. Longer, an experienced and eminent Cotton Broker of New Orleans.
New Orleans, Feb. 28, 1837.
Dr. Jones Dear Sir, in answer to your note of this morning, I will state, that I have carefully examined your new Patent Cotton Gin, and have found it far superior to those generally used in this
